

ELCID DELA PAZ

SOFTWARE DEVELOPER

ABOUT ME

Experienced full-stack developer proficient in front-end (HTML, CSS, JavaScript) and back-end technologies (Python, Java, PHP). Skilled in building interactive web apps with JavaScript libraries (React, Vue.js, Inertia.js) and backend frameworks (Node.js, Express.js, Laravel). Successfully integrates third-party APIs and employs project management tools for efficient solution delivery.

WORK EXPERIENCE

WebArt Design

Australia/Remote
Oct 2023 - Feb 2024

Laravel Developer

- Provided support in website updates using WordPress and Elementor.
- Developed and managed diverse web applications using Vue.js, Tailwind CSS, Inertia.js, Laravel, and MySQL.
- Integrated third-party APIs like Google Maps and Google My Business, incorporating Laravel Socialite for OAuth authentication.
- Implemented Object-Oriented Programming (OOP) principles across projects to improve code structure and maintainability.
- Utilized Laravel Eloquent ORM for effective database interaction, optimizing data management.
- Employed Test-Driven Development (TDD) methodology to uphold code quality and reliability.

Group One JL International Inc.

Clark, Philippines
June 2023 - Sept 2023

Front-end Developer

- Collaborated on developing a website that dynamically adapts to various screen sizes using Vue.js and Tailwind CSS.
- Translated design concepts into functional code.
- Enhanced user interaction by implementing thorough form validation and streamlined navigation with Inertia.js.
- Engineered a robust backend infrastructure using Laravel.
- Facilitated seamless data management operations, such as adding, viewing, editing, and deleting records, by leveraging Laravel Eloquent ORM for communication with a MySQL database.

Adventist Medical Center Manila

Pasay, Philippines
Aug 2022 - Dec 2022

Web Developer

- Assisted in developing a MERN stack (MongoDB, Express.js, React, Node.js) telemedicine web app.
- Integrated Google Calendar API for efficient scheduling.
- Enhanced platform usability with advanced scheduling features.
- Implemented user-centric features for seamless telemedicine experiences.
